ENRICH A COMMUNITY
At CEU, our community is our strength – sharing experience, knowledge and ideas across disciplines, cultures and backgrounds. Made up of students and faculty from over 100 countries, we work together in the spirit of supporting open and democratic societies that respect human rights and the rule of law. This has been CEU’s mission since its founding in 1991. Our English-language bachelor’s programs, accredited in the U.S. and Austria, nurture critical, analytical and creative thinkers who seek solutions to the complex problems of our world. We are CEU. Come join us.

GAIN A GLOBAL PERSPECTIVE
Are you a pioneer, a dreamer, a problem solver, a leader? Then CEU is for you. Here, you’ll join a diverse and close-knit community, study with leading professors and have your voice heard in small classes, get individual attention and make friends for life. During your studies, you can also choose to do an internship as well as study abroad to enrich your experience.

ADMISSION REQUIREMENTS
CEU application form | high school records | proof of English proficiency | CV | application essay | letter of recommendation | standardized test scores such as SAT, ACT, AP or IB (preferred but not mandatory) | evidence of mathematical competence (only for the Quantitative Social Sciences program)
All finalists will be required to attend an online interview with CEU professors.

EARN A VALUABLE DEGREE
CEU’s undergraduate programs integrate into the Europe-wide Bologna system and offer the best of the American undergraduate education system. Students who complete four years of study will receive both an Austrian and a U.S. degree.

SPARK YOUR CAREER
You will develop a wide range of transferable skills – most importantly, the ability to think critically – that will open doors for you. With its network of global employers, online job search platforms and team of advisers, our Career Services Office will help you find an internship and apply for funding as well as provide personal guidance as you find your path. Our Alumni Relations Office will connect you with 18,000 graduates who are making an impact around the world, from Shanghai to Berlin to Los Angeles. You’ll be joining a community that lasts a lifetime.
BA IN CULTURE, POLITICS AND SOCIETY

Our post-truth world needs independent thinkers who can:

• manage the flood of information and disinformation and select what is true
• use cutting-edge multimedia tools to convey their ideas
• ask the big questions, exchange ideas with others and pursue solutions

Students in CEU’s CPS program acquire these skills — the ability to separate fact from fabrication, decipher classical texts and statistical data, understand social media algorithms, produce knowledge and convey it effectively using various media. These are taught alongside a broad liberal arts education, culminating in a disciplinary major such as sociology, political science, international relations, environmental sciences, gender studies and history.

BA IN PHILOSOPHY, POLITICS AND ECONOMICS

Our complex global society needs critical thinkers who can:

• draw from the structures and principles of several disciplines
• develop new ways to look at the issues of our time
• ask questions differently and propose innovative solutions

Students in CEU’s PPE program develop these skills through the study of political and social structures, an examination of fundamental questions about reality and our place in it and an investigation of the principles that govern the production and allocation of resources. Students can do an interdisciplinary BA thesis or capstone project and take courses outside the PPE framework to gain fresh or contrasting perspectives.

BA IN QUANTITATIVE SOCIAL SCIENCES

In the age of data and interconnectivity, humankind needs analytical thinkers who can:

• extract scientific understanding from masses of society-related data to tackle global challenges
• use both quantitative and qualitative tools to make sense of the world
• examine issues from multiple perspectives, discover patterns and hidden connections

Students in CEU’s QSS program gain these skills through a comprehensive training in computational data analysis and mathematical modeling, as well as core theory and methods from sociology, economics, environmental science and political science. They learn how to use the unprecedented amount and quality of digital information available to understand human habits, health, communication and social media, attitudes and opinions, political and economic behavior.
